## Sediment Jar, Soil Art, Dig For Worms

# 1

### Sediment Jar

Layers and layers of natural materials...what will sink first?

#### Supplies Needed:

- clear jar or container with tight lid
- soil
- water

Join us on our Facebook page for instructions!

# 2

### Soil Art

Who knew dirt could be so beautiful!

#### Supplies Needed:

- soil (in varying colors if possible)
- surface to dry soil
- tools to crush soil
- sieve and/or pantyhose to sift soil
- glue
- water
- cups and plates
- watercolor paper
- paintbrushes

### Dig For Worms

Did you know worms play a HUGE part in keeping our soil healthy? And they're everywhere, even when we can't see them. They are especially noticeable during or after a good rain. So, next time we have a rainy day, head outside and see if you can find worms making their way to the ground's surface. Or even better, grab a small trowel and carefully dig down into an area of earth (approved by caregivers) to see how many you can find. It's a busy world under there!
