

Free Printable: Feelin' Like A Robot

Robots have feelings too! Well ok, maybe they don't - but they can be programmed to look like they do. Can you help Kazoo complete each instruction below? As you do, try to make the same face or emote the same feeling as the robot you have selected.

Circle the robot that is winking.

Make an "X" over the robot that is sad.

Make a heart around the robot that loves.

Draw a square around the robot that is surprised.

Draw a squiggly line around the robot that is silly.

Write more "Zs" around the robot that is sleeping.
